La ricerca progettuale di Stormo Studio è accompagnata costantemente dal background comune nell'ambito dell'architettura. Elena Calabrò e Michael Carion indagano l'intrinseca relazione tra spazio e materia e ricercano la fisicità nelle emozioni, lasciando che la forma risultante da questo processo sia naturalmente evocativa e significativa. Stimolati dalle potenzialità del cemento come materiale di design e cercando di sfidare la materia sino al suo limite, hanno progettato Manifesto. La collezione è ispirata alle teorie architettoniche del Metabolismo, riferendosi poi a temi ricorrenti della pratica progettuale dello studio come l'estetica del vuoto e la filosofia orientale. Manifesto si compone di tavoli in diverse dimensioni e configurazioni, caratterizzati da sostegni all'apparenza massicci, ma che in realtà si basano su un equilibrio delicato. Una sfida tecnica che ben rappresenta ricerca di Pulkra.

Everything Stormo Studio creates is informed by the designers' shared background in architecture. Elena Calabrò and Michael Carion investigate the intrinsic relationship between space and material and seek physicality in emotions, letting the form resulting from this process be naturally meaningful and evocative. Manifesto is inspired by the potential the pair saw in concrete and the challenge of seeing how far they could take it. The collection echoes the architectural theories of Metabolism, while incorporating some of the studio's recurring themes such as the aesthetics of the void and Oriental philosophy. Manifesto's tables, in different sizes and configurations, appear to rest on massive supports but in truth feature a delicate balance. A technical challenge, met by none other than Pulkra.
