TILES
BY FINEMATERIA
MADE WITH ACRON®

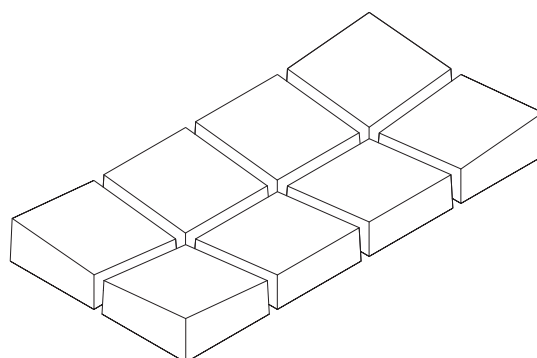

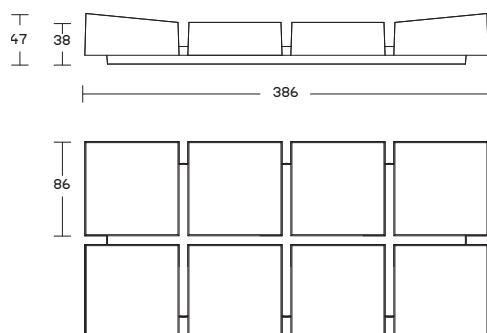

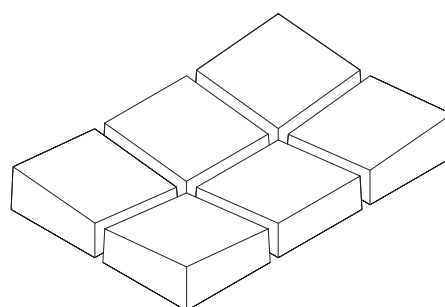

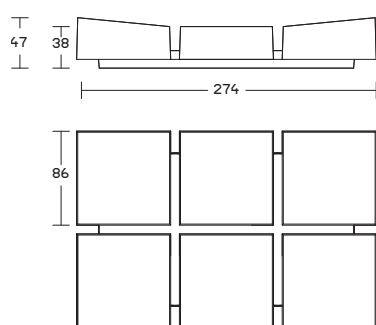

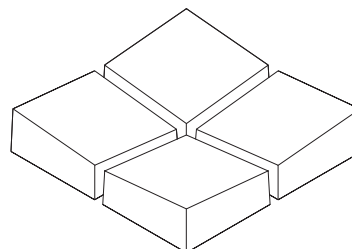

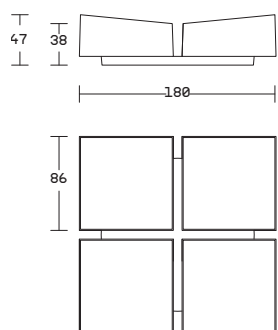

Tiles è una collezione di oggetti che indaga il ritmo e la moltiplicazione di un elemento. In architettura il cemento è reso grafico sfruttando la ripetizione delle sue porzioni e all'alternanza di pieni e vuoti. Il progetto porta con se queste tematiche, racchiudendole in semplici oggetti scultorei.

Il ritmo nei prodotti viene scandito dalle cavità che alleggeriscono e collegano la varie porzioni. Queste porzioni sono come tessere di cemento che con varie inclinazioni modellano gli oggetti. La moltiplicazione degli elementi da vita a tre prodotti differenti per dimensione e utilizzo: uno svuotatasche, un portafrutta e un centrotavola.

Tiles is a collection of objects that investigates rhythm and multiplication of an element.

In architecture, concrete becomes graphic by exploiting the repetition of its portions and to the alternation of solids and voids. The project conveys these themes, encapsulating them in simple sculptural objects.

The rhythm in the products is marked by cavities that relieve and connect the various portions. These portions are like tiles that by varying their inclinations can shape the objects. The multiplication of the elements gives life to three different products: a bowl emptier, a fruit bowl, and a centerpiece.
